Ritesh Agarwal
Senior Engineer – Cloud

Ritesh has over 19+ years of overall IT experience and has worked on various projects and profiles as a Lead Cloud architect and DevOps Lead. He specializes in Cloud migration, App Modernization, DevOps/SRE, and Platform Engineering. He has strong experience in managing cloud native solutions in Azure and Kubernetes. Ritesh has a proven track record of driving digital transformation and managing cross functional teams.

Previous experience

Senior Cloud Platform Engineer
Deutsche Bank

Manager – Cloud Architect
Accenture Solutions Pvt Ltd.

Senior Enterprise Architect
NTT Data

Projects

Platform Design & Build – Auspost– Logistics

Ritesh contributed to the design and development of reusable Amazon EKS platform patterns for Australia Post, enabling secure, scalable, and consistent application deployments on AWS. He defined reference patterns for Terraform-based infrastructure, GitLab CI/CD, networking, workload identity (IRSA), storage, and autoscaling. Working closely with client architects and engineering teams, he helped establish standardised deployment patterns aligned with enterprise security, governance, and cloud-native best practices.

Platform Design & Build – Telstra – Telecom

Ritesh played a central role in architecting and building the Kubernetes-based platform on Azure Cloud (AKS). He led key aspects of the platform foundation including cluster architecture, networking patterns, ingress and egress configurations, and service mesh integration using Istio. Ritesh established GitOps-driven deployment workflows with Argo CD and standardised application delivery using Helm and reusable chart patterns. He worked closely with client engineering and platform teams, facilitating design discussions, guiding implementation decisions, resolving architectural dependencies, and ensuring the platform aligned with enterprise security, scalability, and operational readiness standards. His contribution helped shape a robust, extensible, and future-ready platform that will support ongoing application onboarding and evolution.

App modernization and Platform Build – Deutsche Bank – Banking and Finance

Ritesh led strategic planning and platform design with a strong emphasis on Kubernetes and containerization. He implemented DevOps, SRE, and Platform Engineering strategies, significantly enhancing operational efficiency and accelerating software delivery. By leveraging Infrastructure as Code (IaC) tools like Terraform and integrating GitOps practices with ArgoCD, he ensured seamless continuous delivery. Ritesh provided technical leadership across cloud platforms (Azure, GCP) while driving the adoption of monitoring solutions and security best practices within Kubernetes environments.

Skills / Areas of expertise

- Cloud Platforms: AWS, Azure and GCP.
- Containerisation: AKS, EKS, GKE, Kubernetes.
- CI/CD Tools: Azure DevOps, Bitbucket, Jfrog, Jenkins, Github.
- Agentic AI: Claude, Github Copilot.

Certifications

- Claude Certified Architect – Foundations, **CCAF**
- Graduate Certificate in **Artificial Intelligence**, Deakin Uni.
- Certified Kubernetes Security Specialist, **CKS**.
- Claude Certified Architect – Foundations, **CCAF**
- Certified Kubernetes Administrator, **CKA**.
- HashiCorp Certified Terraform Associate
